

A.I. Disclaimer: Work for this assignment was completed with the aid of artificial intelligence tools and comprehensive documentation of the names of, input provided to, and output obtained from, these tools is included as part of my assignment submission.

I just used Claude 3.5 Sonnet to generate test words, which did end up helping me find a bug with certain words such as "accommodate" with the Confusion Matrix.

I did not use any LLM output for my program functionality.

List commonly misspelled words and ways they can be misspelled

Here's a list of commonly misspelled words along with some of their frequent misspellings:
